

VeriStack Trust

Governance-as-a-Service: Adopt AI Boldly. Stay Compliant Securely.

An AI governance advisory service from VeriStack Inc.

The Problem Just Became Urgent

On June 4, 2026, Canada launched **AI for All**, its national AI strategy. Two things are now true for every Canadian business at once:

- **You are expected to adopt AI.** The strategy pushes national AI adoption from 12% to 60% by 2034, with funding to help small and medium businesses do it.
- **That AI must be trustworthy.** The strategy's Build Trust pillar is modernizing privacy law, expanding the Canadian AI Safety Institute, and tightening rules on data, transparency, deepfakes, and automated decisions.

Most organizations have no one who can do the second part. They are adopting AI faster than they can govern it. That gap is risk: regulatory exposure, lost customer trust, and decisions no one can defend in an audit.

VeriStack Trust closes that gap.

Who This Is For

- Small and mid-market firms adopting AI tools and agents without a governance function.
 - Financial, professional services, healthcare, and regulated-adjacent businesses.
 - Founders and leaders who need to move fast on AI but cannot afford a compliance misstep.
-

What You Get: Three Tiers

Tier 1: AI Governance Readiness Assessment

\$5,000 | 2 weeks | Fixed scope

A clear-eyed picture of where you stand and what to fix first. - AI inventory: where AI is used or planned across the business - Risk and exposure review against AI for All trust expectations, PIPEDA, and emerging AI rules - Gap analysis mapped to NIST AI RMF and ISO/IEC 42001 - Prioritized remediation roadmap with quick wins - Executive readout deck

Tier 2: Responsible AI Framework Build

\$12,000 to \$18,000 | 4 to 6 weeks | Fixed scope

The policies and controls that make your AI defensible. - Responsible AI policy and acceptable-use standards - Control framework: human-in-the-loop gates, confidence thresholds, audit trails, model and data governance - Data privacy and transparency controls aligned to incoming legislation - Role and accountability model (who owns AI decisions) - Staff guidance and rollout plan

Tier 3: Governance-as-a-Service (Ongoing)

\$2,500 to \$5,000 / month | Retainer

Your fractional AI governance function. - Quarterly governance reviews and control testing - New-tool and new-use-case risk assessments on demand - Regulatory monitoring and impact briefings as AI for All legislation rolls out - Audit and procurement support (governance documentation buyers and regulators trust) - Priority advisory access

Why VeriStack

- **Proven in production.** VeriStack built Sentinel, a live AI compliance platform with a working governance engine: control gates, audit trails, and confidence-based routing. We do not theorize governance. We have shipped it.
- **A decade in financial-services GRC.** Real experience in risk, compliance, and data governance inside regulated institutions.
- **Framework fluency.** NIST AI RMF, ISO/IEC 42001, PIPEDA, and the direction of Canada's AI for All trust agenda.
- **Speed.** Fixed scope, fixed price, fast delivery. You get answers in weeks, not quarters.

How to Start

1. **Free 30-minute AI for All readiness call.** We tell you the three risks most likely to bite you first.
2. **Choose a tier.** Most clients start with the \$5K Readiness Assessment.
3. **Move fast, governed.** Adopt AI with confidence while competitors hesitate.
